**AUTOMATED COAGULATION  
INSTRUCTIONS TO PARTICIPANTS**

**Clinical details:**

**To follow with the next surveys.**

**Important information:**

Submit the results via email [haempts@nhls.ac.za](mailto:haempts@nhls.ac.za)

[Sample type](#)

The sample is presented as a lyophilised material.

**Handling instructions:**

- Carefully open the vial of material.
- Add 1 ml of distilled water into each vial,
- Allow to stand for 10 minutes.
- Gently swirl the control vials.
- Allow to stand again for 15 minutes.
- The samples are ready to be processed.
- Use the material within 8 hours of reconstitution.

**The samples should be handled in the same manner as the patient samples.**

**Stability:**

- Reconstituted and stored at 2-8°C stable for 8 hours.
- Reconstituted and frozen at -20°C stable for 48 hours.

**Storage:**

- Opened vial stored at 2-8°C stable for 7 days.
- Opened vial stored at -20°C stable for 28 days.
- Unopened vial stored at 2-8°C stable until expiry date.
