1	This Standard Bidding Document (SBD) must form part of all bids ¹ invited.							
2	Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement							
	between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging). ² Collusive							
	bidding is a <i>pe se</i> prohibition meaning that it cannot be justified under any grounds.							

- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

I, the undersigned, in submitting the accompanying bid:	
(Bid Number and Description)	
in response to the invitation for the bid made by:	
(Name of Institution)	
do hereby make the following statements that I certify to be true and comple	ete in every respect:

- 5. For the purposes of this Certificate and the accompanying bid, I understand that the word "competitor" shall include any individual or organization, other than the bidder, whether or not affiliated with the bidder, who:
 - (a) has been requested to submit a bid in response to this bid invitation;
 - (b) could potentially submit a bid in response to this bid invitation, based on their qualifications, abilities or experience; and
 - (c) provides the same goods and services as the bidder and/or is in the same line of business as the bidder
- 6. The bidder has arrived at the accompanying bid independently from, and without consultation, communication, agreement or arrangement with any competitor. However communication between partners in a joint venture or consortium³ will not be construed as collusive bidding.
- 7. In particular, without limiting the generality of paragraphs 6 above, there has been no consultation, communication, agreement or arrangement with any competitor regarding:
 - (a) prices;
 - (b) geographical area where product or service will be rendered (market allocation)
 - (c) methods, factors or formulas used to calculate prices;
 - (d) the intention or decision to submit or not to submit, a bid;

9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.

11 TERMS OF REFERENCE / SPECIFICATION

APPOINTMENT OF A SERVICE PROVIDER - DIGITAL SIGNATURE LICENCES

1. The Scope of this RFQ

RFQ for the provision of a digital signature licences

1. Introduction

The NHLS was established in 2001 by an Act of Parliament to provide diagnostic pathology laboratory services to the national and provincial health departments. The NHLS is a public health laboratory service with laboratories across South Africa. Its activities comprise of diagnostic laboratory services, research, teaching and training, and production of sera for anti-snake venom, reagents and media. At the core of the NHLS is next generation pathology excellence that supports the mandate of the Department of Health.

- The NHLS is the largest diagnostic pathology laboratory service in South Africa.
- The NHLS employs approximately 8000 staff.
- There are 260 laboratories across the nine provinces.
- The NHLS serves approximately 80% of the South African population

2. Background

The NHLS is currently automating manual business processes which require manual forms to be converted to electronic forms to kick start workflows. This includes manual submissions requiring approvals to also be made electronic. This is part of the IT green initiative addressed by digitization, digitalisation and optimisation of NHLS business processes. As the NHLS is moving away from paper-based processes to more digital processes the need for digitally signing and authenticating of documents, files, and forms becomes a need.

The NHLS has invested in the Open Text ECM Content Server solution to address compliance, digitisation and digitalisation of content and business processes. The ECM system has a Workflow management system with a standard electronic signature module. To ensure compliance the NHLS requires a digital signature as an upgrade to the existing electronic signature.

3. Acronyms and Abbreviations

Term	Definition
NHLS	National Health Laboratory Service
RFQ	Request For Quotation
ECM	Enterprise Content Management
CS	Content Server
TLS	Transport Layer Security
PKI	Public Key Infrastructure

4. Strategic Goal / Objectives

The NHLS requires a service provider to provide a digital signature solution for the NHLS.

5. Statement of work

The NHLS hereby invites Request for Quotations from suitably qualified bidders to provide a secure digital signature solution with twenty-five (25) digital signatures which seamlessly integrates with the current workflow management system of the Open Text ECM Content Server system.

6. Scope of work

The NHLS has requires a digital signature solution which is secure, guarantees non-repudiation and should be easy to deploy and easy to use.

Requirements:

- 25 digital signatures and unlimited external signatures.
- Unlimited number of documents to be signed
- Standalone & Integration capabilities: Integrate with Open Text ECM Content Server system
 Workflow management engine. Enable integration of processes such as document approval into a
 Content Server Workflow. It should also allow for signing of documents that do not form part of
 workflows as well.
- User authentication: The solution should authenticate users using multifactor authentication prior to signing. The solution must also tie that authentication to the e-signature/digital signature and the signed record. Furthermore, the solution must support various authentication mechanisms including usernames and passwords, tokens, challenge-response, email verification through e-sign session invitation, integration with active directory, digital certificate, etc. In addition, the solution must be able to adapt the authentication methods to the risk profile of the NHLS and to automate the process.
- **Compliance:** Legally be identified as an advanced electronic signature or standard digital signature.

 Align with international and local regulations for legality and validity of digital signatures.

- Embedded audit trail: The solution must provide the ability to independently verify and archive the e-signature/digital signature. This is important even when the contract between NHLS and the service provider has ended. NHLS and its stakeholders will not have to go online to access or verify the digitally signed document. The solution must therefore embed the digital signatures, time stamping and audit trail directly in the document. The solution should also provide the ability for NHLS to index, store, and retrieve the digitally-signed document in the system of record of our own choosing, not only limited to the service provider's cloud storage. This helps the NHLS to comply with its own long-term retention requirements.
- **Document and signature security:** The solution must package and secure the final e-signed/digitally-signed document using a digital signature which must be applied at two levels: signature level, to prevent tampering with the signature itself, as well as at document level, to prevent tempering with the document's contents. The solution should provide a comprehensive audit trail that includes the date and time of each signature. This audit trail must be securely embedded in the document and linked to each signature, with the ability to verify the validity of the signed record offline, without going to a website. The solution must also provide the ability to download a verifiable copy of the signed record with the audit trail. All data/ information classified as critical should be processed and stored within the border of South Africa.
- Audit trail of the signing process: the solution must be able to capture a comprehensive audit trail
 of the signing process to allow the NHLS to demonstrate exactly how the signer completed the
 transaction on the web or via a mobile device. Information that must be captured include IP address,
 date and time stamp of all events, all web pages, documents, disclosures, and other information
 presented, the length of time spent reviewing each document, what each party acknowledged,
 agreed to, and signed, as well as all other actions taken during the transaction
- Platform security: The solution must provide data encryption for data transit and at rest with Transport Layer Security (TLS) connections and AES 256-bit encryption, Public Key Infrastructure (PKI) tamper-evident seal, as well as signature verification and unalterable capture of signing actions and completion status. Detect any subsequent alterations or corruption of the signed data message in the document. In addition, the service provider must comply with regulatory, industry and IT

standards for security and data protection including ISO 27001, SOC 1/2/3, FIPS 140-2, POPIA, Cloud Security Alliance.

- Physical security: The vendor should have geo-dispersed data centres with active and redundant systems, physical and logically separated networks, malware protection, secure near real time data replication as well as strict physical access control.
- **User friendly:** The registration or sign-up process of the signature should be seamless and easy. The digital signature solution should be easy to use with limited to no training required.
- Multiple Application Support and multiple signatures: The digital signature solution must accommodate or support different applications. In addition, allow for different approval levels (more than one person in more than one place to sign a document). The solution should ensure external customers or supplier who has not installed the same solution can easily verify without the need for complicated, proprietary third-party applications.
- **Solution Delivery Requirements:** minimum hardware and software requirements for using the proposed solution must be specified

The final stage of evaluation is done after the CFET has reached their verdict and is done by NHLS Procurement Services. B-BBEE score (commercial evaluation) is added in order to get the final order of merit for the bidders being evaluated.

Bid will be evaluated on the basis of the PPPFA 80/20 point system as presented in the Preferential Procurement Regulations 2017, for this purpose SBD 6.1 form should be scrutinized, completed and submitted together with your quotation. The 80/20 point system will be as follows:
