3 BACKGROUND

National Health Laboratory Services [hereinafter referred to as NHLS] is a public health laboratory service with laboratories across South Africa. Its activities comprise diagnostic laboratory services, research, teaching and training, and production of sera for anti-snake venom, reagents and media.

NHLS was established in 2001 by an Act of Parliament to provide diagnostic pathology laboratory services to the National and Provincial Health Department.

4 SCOPE OF WORK

A business case written in July 2012, consisted of document management requirements, which was to have entire lab request forms and manual documents accessed electronically. The Open Text ECM solution was implemented in NHLS 2013/14 to address the requirement including Compliance, Collaboration and Communications, Cost reduction. The Green IT initiative was to be achieved by digitizing and enhancing NHLS business processes which includes scanning of lab request forms. In order to digitise/scan lab request forms, standalone scanners were required at each lab for scanning lab request forms.

The NHLS had an active Managed Print Service (MPS) contract for 5 years which started July 2013. A request was made to the service provider to provide a proposal based on the scanner requirements. In order for the service provider to address the scope of the scanner requirements for laboratories across all 6 regions, a proposal with 3 types of Kodak scanners based on lab volumes was recommended.

An addendum was made to the current MPS contract, and was signed December 2014 to accommodate the Kodak scanner requirements. Since then, over 260 scanners were distributed across the country to start the scanning process.
