FORM OF QUOTATION SUPPLIER NAME: \_\_\_\_\_

RFQ NO: 1922137

**SUPPLY AND DELIVERY OF WEIGHING SCALE FOR HORSES AT NHL SANDRINGHAM CAMPUS**

#### **PURPOSE**

The purpose of this document is to motivate for the procurement of a calibrated horse weighing scale for use in stables. The scale will be used to determine the body weight of horses involved in plasma production to ensure appropriate feeding regimens, monitor health status, regulate plasma collection volumes, and comply with IDEXX testing and quality assurance requirements. Correct weight measurement is important for animal welfare, production productivity, and regulatory compliance.

#### **BACKGROUND**

Horses kept for antivenom production require ongoing health monitoring and controlled plasma collection procedures. Body weight is an important parameter for determining nutritional requirements, medication dosages, sedation protocols, and safe plasma withdrawal volumes.

Currently, weight estimation is performed using visual assessment, which may not be accurate. Inaccurate weight estimation may lead to underfeeding or overfeeding, inappropriate plasma collection volumes, and inconsistent health records.

Furthermore, IDEXX diagnostic testing require correct and documented animal data, including body weight, particularly when running IDEXX tests and maintaining traceable health and production records. A calibrated weighing scale is therefore necessary to meet operational and regulatory standards.

#### **DISCUSSION**

Consultations with the Stables supervisor, Manager Biological, and veterinarian have confirmed the operational need for a dedicated horse weighing scale within the antivenom production facility.

Accurate body weight measurement will assist with:

- Correct calculation of daily feed portions based on individual horse requirements.
- Safe determination of plasma collection volumes relative to body weight.
- Accurate dosing of medications, vaccines, and supportive treatments.
- Monitoring of body condition trends over time to detect early health issues.
- Compliance with IDEXX testing requirements and audit documentation standards.

The scale should be strong, easy to clean, and capable of withstanding stable environmental conditions. Digital recording capability is recommended to support accurate data logging and traceability.

#### **ORGANIZATIONAL AND PERSONNEL IMPLICATIONS**

The absence of an accurate weighing system affects feeding management, plasma production planning, and veterinary oversight. Inconsistent or estimated weights may result in ineffective feed usage, inconsistent plasma yield, and potential welfare concerns.

The procurement of a horse weighing scale will:

- Improve production planning and plasma yield consistency.
- Enhance animal welfare through accurate nutritional and medical management.
- Support veterinary decision-making.
- Strengthen compliance with IDEXX and quality assurance standards.
- Reduce risks associated with improper dosing or excessive plasma withdrawal.
